

48

HOUR

FLIP

BUY

Car Corrals have hundreds of vehicles for sale during any given event. This makes for a perfect platform for the opening segment for the show. Two teams have only **48** hours to buy a vehicle and flip it by the end of show. Choosing the right vehicle is the key to success during this competition, because each team only has \$10k to work with and the one with the biggest profit from their flip wins.

FIND

Both teams and their expert advisor meet back in their build areas and discuss the build strategy. This is a timed build and in most cases the teams only have 48 hrs to complete the build. Some will stay back and start the deconstruction, while the others head out to find the needed parts sprawled out over the **miles** of swap meet area. The pressures on! Find the hidden treasures and their one step closer to victory!

BUILD

The pressure is on.. With the deadline approaching, the teams must complete their builds, ready for auction day coming up. The pace is frantic and parts are missing! Back out to the swap meet or face the defeat. The teams are feeling the pressure! Who will overcome the stress. Now it's not who will build the better vehicle, it's who actually finish the build in time!

FLIP

It's show time... The teams frantically finish their builds and make it to the auction line just in time. Now it's time to see how well their choice of vehicle and buildout pay off. When the hammer drops the competition has ended. The Car auction is the true deciding factory on who wins this competition!
